OBJECTIVE

Aspiring Information Technology student with a solid foundation in programming, web development, and database systems. Proficient in Java, HTML, CSS, and JavaScript with proven ability to apply technical skills through hands-on projects and internships. Seeking an opportunity to contribute to a software development team, enhance full stack development capabilities, and grow in a collaborative and innovative environment.

TECHNICAL SKILLS

Programming Languages	Java
Frontend Technologies	HTML, CSS, JavaScript
Database	MY SQL
Tools	Eclipse, VSCode, GitHub

EDUCATION

Panimalar Engineering College
B.Tech in Information Technology
CGPA: 8.73/10

Oct 2022 - Apr 2026

EXPERIENCE

Machine Learning Intern | LearnFlu

Sep 2024 - Jan 2025

- Built and trained machine learning model for image classification, focusing on differentiating various types of waste materials.
- Performed image preprocessing tasks such as resizing, normalization, and data augmentation to improve model accuracy.
- Evaluated model performance using accuracy, and confusion matrices, and optimized the model through tuning.
- Gained expertise in preprocessing, training, and evaluating ML models.

PROJECTS

Real Waste – Image Classification

- Technologies: Python, Random Forest, Scikit-Learn, OpenCV, NumPy, Pandas
- Built a Random Forest based machine learning model to classify waste materials such as plastic, paper, metal, etc.,
- Performed image preprocessing tasks like normalization and data augmentation to improve dataset quality.
- Extracted features from waste images using OpenCV and converted them into numerical data for model training.
- Evaluated model performance using accuracy score and confusion matrix, optimized parameters for better results.

Face-Based Attendance System using Python & OpenCV

- Technologies: Python, OpenCV, Tkinter, NumPy, Pandas
- Developed a face-recognition attendance system that captures, trains, and identifies student faces using a webcam.
- Implemented face registration, image capturing (50+ samples), model training, and automatic attendance marking.
- Built a simple Tkinter GUI for registering students, taking attendance, and viewing subject-wise CSV records.
- Used Haar Cascade for detection and LBPH for recognition, ensuring accurate and efficient attendance tracking.

CERTIFICATIONS

- Java Foundation Certification – Infosys Springboard (June 2025).
- Data Base Management System – Swayam/NPTEL (March 2024).

ACHIEVEMENTS

- Solved 100+ problems on LeetCode, enhancing algorithmic and coding proficiency.
